WHAT IS HIV? WHAT IS AIDS? WHAT IS BEING DONE TO CURE IT?

These questions sent Canadian filmmaker Brent Leung on a worldwide journey, from the highest echelons of the medical research establishment to the slums of South Africa, where death and disease are the order of the day. In this up-to-the-minute documentary, he observes that although AIDS has been front-page news for over 29 years, it is barely understood. Despite the great effort, time, and money spent, no cure is in sight.

The HIV/AIDS story is being rewritten, and this is the first film to present the uncensored POVs of virtually all the major players—in their own settings, in their own words. It rocks the foundation upon which all conventional wisdom regarding HIV/AIDS is based. *House of Numbers* could well be the opening salvo in the battle to bring sanity and clarity to an epidemic clearly gone awry.
